Eden Amzallag

Computer Science Student
Building AI-Assisted Mobile Products

ABOUT ME

Computer Science student passionate about building modern mobile products that solve real operational problems.

I focus on clean UX, reliable systems and data-driven decisions to create value for teams and organizations.

SKILLS

MOBILE

- React Native
- Expo

BACKEND & DATA

- Supabase
- APIs (REST)

TOOLS & TECHNOLOGIES

- GitHub
- VS Code

LANGUAGES

French	Native
English	Professional
Hebrew	Intermediate

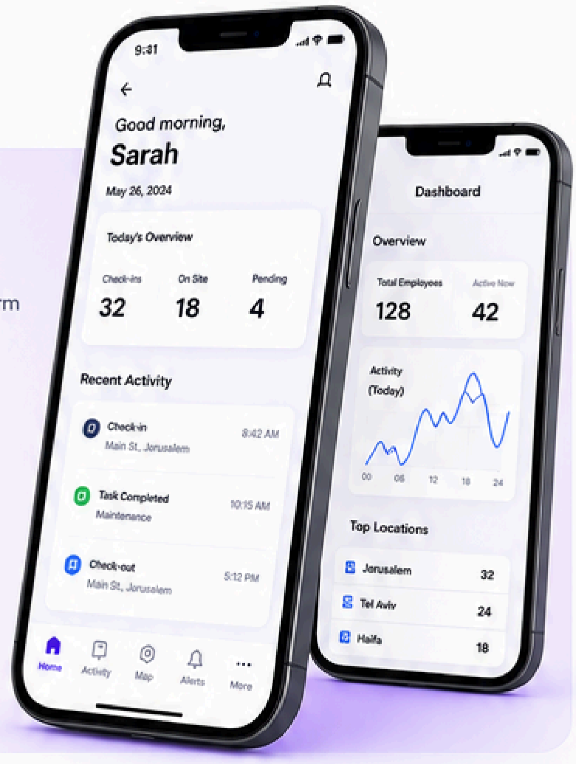
FEATURED PROJECT

Badgy

Operational Management Platform for Field Teams

A mobile-first platform that helps organizations manage field operations, track employee activity and streamline daily workflows in real time.

MOBILE APP · REAL-TIME DATA · WORKFLOWS · OPERATIONAL SYSTEMS



PROJECT HIGHLIGHTS

Live Tracking
Real-time check-in / check-out with accurate geolocation.

Smart Scheduling
Intelligent task allocation and shift management.

Analytics Dashboard
Live statistics and insights to drive better decisions.

Attendance Management
Absence tracking, history and validation workflow.

Real-time Updates
Instant notifications and activity monitoring.

Multi-site Support
Communication across multiple locations.

WHAT I'M LEARNING

- Mobile App Architecture
- APIs & Backend Communication
- Database Systems & Security
- Product Thinking & UX

EDUCATION

Computer Science Studies — 2023 – Present

Machon Tal (Jerusalem College of Technology)

Relevant coursework: Data Structures, Algorithms, Software Engineering, Databases, Operating Systems, Web Development.

ABOUT ME

Problem Solver
I enjoy understanding complex problems and building practical, scalable solutions.

Builder Mindset
I love turning ideas into real products that create value for users.

Always Learning
I stay curious and constantly explore new technologies and approaches.

> Building the future of work, one product at a time.
